- ▶ Carry out risk assessments, and provide live method statements and Crane Plans.
- ▶ Full CDM, inc. Site Establishment, Fencing, Signage, Segregation and Separation PPE.
- ▶ Specialist time served engineers, Fitters, Welders, Riggers trained in the use of :-
 - ▶ MEWP
 - ▶ FLT
 - ▶ Tele Handlers,
 - ▶ PASMA Scaffold Towers
 - ▶ PUWER
- ▶ WAHR and Confined Space

YOUR RELIABLE PARTNER FOR SITE SAFETY 

Don Valley Construction is part of the Don Valley Engineering Group of companies, bringing a wealth of knowledge and expertise for the installation and erection of plant and equipment.

Established in 2007, initially to provide installation services for the company's own range of Heavy Duty Material Handling equipment. The company now provide installation services for many third party equipment suppliers including CDM Principle Contractor and Site Management.

Our Installation Management Engineers provide full risk assessments, prepare method statements and plans for lifting, working at height or confined space. They work closely with sub-contractors and utilise the skills of specialist suppliers like crane or scaffold companies.

The Site Teams work closely with Don Valley's own Engineering Project Managers and Project Engineers to ensure the project timelines are achieved. All equipment is delivered on time, off loaded and safely stored, until ready for installation when the program calls for it.

CDM

CDM (Construction Design & Management) site establishment services are a key service we provide, we undertake all site responsibilities to comply with CDM Regulations, 2007 providing the following services:
