

Marc Styan.

Chief Project engineer

22nd April 2013.

To whom it may concern!

Don Valley Engineering have for the last four months been working for Portasilo at our Drax power station Phoenix BDS project.

They have worked under the CDM site regulations and also under Drax power station rules and regulations under both our and their own method statements and risk assessments.

They have been professional and diligent in their approach to their work with the utmost safety consciousness; they have been flexible with regard to working hours and conditions.

They have a broad cross section of workforce skilled in the various disciplines of engineering site installation.

Supervision is well trained with certificates in IOSH, NEBOSH, SMTD, and appointed persons (lifting operations).

In addition several operators are trained first aiders.

I would have no hesitation in using Don Valley on future projects.

If you have any concerns please do not hesitate to contact me at your first instance.

Regards

Marc Styan.

Chief Project engineer.

Portasilo.
