

MULTI-ANGLE 'BANANA' SCREENS

COAL - AGGREGATES - POTASH **ORES - RECYCLING**

- bespoke design to suit customer requirements
- single Deck
- twin Deck
- Huck bolt construction
- exciter unit linear motion
- High grade boiler steel side plates
- Over 20 years operational life expectancy
- A 'best value' investment

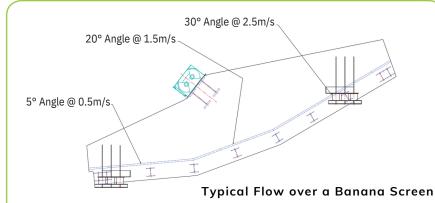

OPTIMAL PERFORMANCE TOTAL RELIABILITY

MULTI-ANGLE BANANA VIBRATING SCREENS

Don Valley engineering linear motion Vibrating screens, are used around the world in many of the most demanding operations. More than 40 years of experience in vibrating screen design and development has resulted in a standard of screen which is amongst the most robust, reliable and efficient available. Many of our screens have been operational for more than 20 years, and as a result they represent truly exceptional value for investment. We only build machines which last.

The Benefits of Multi-angle Screening are:-

- Improved efficiency in sizing material due to formation of a thin bed depth
- Smaller footprint
- Lower water consumption with wet screening
- Lower energy requirement, for an equivalent throughput on a conventional flat deck screen
- Higher feed rates for an equivalent deck area

SCREEN DATA

► Effective Width: Up to

5000mm

Effective length:

Up to 12000mm

Mass: Up to 30T

Deck Area: Up to 44M²

Vibratory Motion: Linear

➤ Amplitude: Up to 15mm➤ Frequency / Speed: 850 to 950

cycles/min
To suit

Angle of Throw:

application

Inclination: Variable,

multi-angle

Flow Speed: Variable

Capacity: >3000 TPH

subject to

material

Deck Configurations: Single/ Twin

Deck

Deck Types: Compatible

with most deck media

GET YOUR BANANA DECK SCREEN SPECIFIED BY THE EXPERTS

Our application engineers will be pleased to provide you with a specification for the best screen to meet your requirements. Simply provide us with the following basic information:-

- Type of material
- Size analysis of feed material
- Bulk density
- ► Feed rate (TPH)
- Moisture content
